Business Problem Statement

Business Problem Statement

A leading retail company wants to better understand its customers' shopping behavior in order to improve sales, customer satisfaction, and long-term loyalty. The management team has noticed changes in purchasing patterns across demographics, product categories, and sales channels (online vs. offline). They are particularly interested in uncovering which factors, such as discounts, reviews, seasons, or payment preferences, drive consumer decisions and repeat purchases.

You are tasked with analyzing the company's consumer behavior dataset to answer the following overarching business question:

"How can the company leverage consumer shopping data to identify trends, improve customer engagement, and optimize marketing and product strategies?"

Deliverables

1. **Data Preparation & Modeling (Excel):** Clean and transform the raw dataset for analysis.
2. **Data Analysis (Excel):** Organize the data into a structured format and extract insights on customer segments, loyalty, and purchase drivers.
3. **Visualization & Insights (Excel):** Present key patterns and trends across multiple report sheets, enabling stakeholders to make data-driven decisions.
4. **Report and Presentation:** Summarize your key findings and business recommendations in the report sheets of the workbook. Prepare a presentation that visually communicates insights and actionable recommendations to stakeholders.
5. **GitHub Repository:** Include the Excel workbook and supporting project files in a well-structured repository.
